SUMMARY

Full-Stack Developer skilled in crafting end-to-end web applications with focus on **performance, scalability, and clean architecture**. Eager to build **impactful digital solutions** using modern frameworks and emerging technologies. Driven by passion for **continuous learning** and **innovation**, delivering **efficient, reliable, user-focused** software experiences.

EXPERIENCE

KenboxTech Pvt. Ltd., Noida

June 2025 – Oct 2025

Software Quality Assurance Engineer

- Executed comprehensive manual and automated testing across complex web applications, ensuring reliable, high-quality product releases with zero critical post-deployment defects.
- Designed detailed test cases, regression suites, and performance reports perfectly aligned with Agile sprint workflows, achieving 95% test coverage across all features.
- Collaborated closely with developers and stakeholders to identify, prioritize, and resolve critical bugs, dramatically enhancing product performance, user experience, and cross-team communication efficiency.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS

Web Technologies: HTML5, CSS3, RESTful APIs, JSON

Database: MongoDB, MySQL

Testing & Tools: Postman (API), Selenium, Git, GitHub, VS Code, IntelliJ IDEA, Figma

PROJECTS

E-Learning Platform

- Built scalable full-stack E-Learning platform with React.js, Redux, Node.js, Express.js featuring JWT auth, course creation, payments, and admin dashboards.
- Secured with JWT authentication, bcrypt encryption, and role-based access control for students/instructors.

Smart E-Commerce Platform

- Developed a full-stack Smart E-Commerce platform using the MERN stack, supporting user and admin roles, dynamic product listings, advanced search, filters, and a responsive shopping experience.
- Implemented JWT-based authentication, role-based access control, secure payment gateway integration, cart and order management, along with an admin dashboard for product, order, and user administration.

Other Projects: Weather Application, Task Manager, Portfolio Website, Blog Management System

EDUCATION

Meerut Institute of Technology

2021 – 2025

Bachelor of Technology in Computer Science

CERTIFICATIONS

- Full-Stack Virtual Internship:** Developed full-stack web applications using React.js, Node.js, and MongoDB through hands-on projects and expert mentorship.
- Java Development Internship:** Built Java backend applications using Spring Boot and OOP principles, improving API development and Agile team collaboration.
- Data Analytics Certification (Grade-B):** Certified in data analytics covering visualization, interpretation, and actionable insights using analytical tools.

ACHIEVEMENTS & INTERESTS

- Enthusiastic about exploring new frameworks, tools, and libraries to enhance development efficiency, scalability, code quality, and overall software performance in modern web applications.
- Actively follow emerging technology trends including AI-driven development, cloud computing, and modern web architectures to stay ahead in the tech landscape.
